EXPERIENCE

Backend Developer Intern at Ratoverse. ([View here](#))

Jan - July, 2025

- Solely responsible for designing and building a secure and scalable backend platform using NestJS, delivering 30+ RESTful API endpoints for core social media functionality.
- Implemented authentication and user-management features including Google OAuth 2.0 sign-in, OTP verification, profile customization, hashtag support, and secure account workflows.
- Designed and optimized MongoDB schemas with geospatial indexing for efficient location-based queries while ensuring scalability and maintainability of backend services.

SKILLS

Languages	JavaScript, TypeScript, C++
Technologies/Frameworks	NodeJS, NestJS, ExpressJS, ReactJS, MongoDB, PostgreSQL, Redis, RBAC RESTful APIs, JWT Authentication, OAuth 2.0, Docker, Docker Compose, AWS S3, AWS EC2, Azure, Inngest
Developer Tools	Visual Studio Code, Git, GitHub, Postman, Bruno, MongoDB Atlas, Cursor Linux

PROJECTS

StoryAlbumCompany (Freelance Client Project). ([Ongoing](#))

- Developing the backend architecture for a digital commerce platform that enables customers to purchase personalized photo albums, using NestJS within a TurboRepo-based monorepo architecture.
- Implemented authentication and authorization systems using JWT, Google OAuth 2.0, Argon2 password hashing, refresh tokens, RBAC, and Redis-backed rate limiting.
- Built file upload workflows integrated with AWS S3, email automation systems, and event-driven background job processing using Inngest.
- Configured PostgreSQL and Redis services using Docker Compose while maintaining shared packages and type-safe APIs across the monorepo.

CoverGenius. ([Try it here](#))

- Developed an AI-powered web application that generates personalized and professional cover letters in real-time using user resumes and job descriptions.
- Implemented dynamic content personalization and job-matching logic to improve relevance and quality of generated cover letters.
- Deployed on Vercel to ensure reliable availability and low-latency performance.

EDUCATION

Bachelor of Technology, Narula Institute of Technology

2023 - 2027

Computer Science and Engineering with specialization in Artificial Intelligence and Machine Learning

CGPA(out of 10): 8.68

ACHIEVEMENTS

Patent on IoT-Enabled Predictive Farming System with Resource Optimization ([View Doc. Here](#))

Application (202531042207 A) published by the Indian Patent Office, by the Government of India on May 23, 2025
